DETAILED ACTION

1. Claims 1-12 and 15 are pending and have been examined.

Terminal Disclaimer

2. The terminal disclaimer filed on 6-4-2009 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration dates of US 6,075,859 and US 6,768,797 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 1-12 and 15 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Independent claims 1 and 15 are rejected under 35 U.S.C. 101 based on Supreme Court precedent and recent Federal Circuit decisions, a 35 U.S.C § 101 process must (1) be tied to a particular machine or (2) transform underlying subject matter (such as an article or materials) to a different state or thing. In re Bilski et al, 88 USPQ 2d 1385 CAFC (2008); Diamond v. Diehr, 450 U.S. 175, 184 (1981); Parker v. Flook, 437 U.S. 584, 588 n.9 (1978); Gottschalk v. Benson, 409 U.S. 63, 70 (1972); Cochrane v. Deener, 94 U.S. 780,787-88 (1876). An example of a method claim that

would not qualify as a statutory process would be a claim that recited purely mental steps. Thus, to qualify as a § 101 statutory process, the claim should positively recite the particular machine to which it is tied, for example by identifying the apparatus that accomplishes the method steps, or positively recite the subject matter that is being transformed, for example by identifying the material that is being changed to a different state. Here, the applicant's method steps are not tied to a particular machine and do not perform a transformation. Thus, the claims are non-statutory. The mere recitation of the machine in the preamble with an absence of a machine in the body of the claim fails to make the claim statutory under 35 USC 101. *Note the Board of Patent Appeals Informative Opinion Ex parte Langemyer et al.*

Both of claims 1 and 15 are directed towards a method of encrypting data: "...in a communications system." However, a reasonably broad construction of the claim language would include the case where the encryption steps are carried out by hand and not by any electronic processing apparatus. By this construction, the claims fail to meet the standard set forth by the court in *Bilski*.

The Applicant may wish to amend the claim language to more explicitly recite a limitation that specifies the method as one carried out by a particular processor.

Claims 2-12 are dependent on claim 1 and do not cure its deficiency. Therefore they are rejected on the same basis as that claim.

* The Examiner was unable to contact the Applicant to discuss a change to the claim language prior to the preparation of this Office Action.
